Problem Oriented Screening Instrument for Teenagers (POSIT)

Clinical Utility of The POSIT is a cost-efficient, easy-to-use problem screen for use with Instrument

troubled adolescents who may have one or more problems amenable to treatment or to a combination of preventive services. The POSIT can be administered by staff in schools, the juvenile and family court system, and medical, psychiatric, alcohol and chug treatment programs as the first step toward determining those potentially problematic areas that require a more comprehensive, thus-expensive, diagnostic assessment. The POSIT is useful in a case management system in conjunction with a community network of clinical services; it can also be used as a descriptive measure in program evaluation.

Research Applicability

The POSIT can be used to collect baseline data to comprehensively describe adolescent subject populations. The POSIT-Follow up Questionnaire can be used as a change measure.
