

Methamphetamine Use Trends and Consequences in the Northwestern United States

July 31, 2019 | 12:00-1:00pm (PT)

About the webinar

Methamphetamine use is increasing in the wake of the opioid crisis, particularly in the Western United States. This webinar will describe current trends, including methamphetamine use among people who inject drugs, health consequences like recent HIV outbreaks, non-fatal and fatal overdose, and treatment interest and options.

When: Wednesday, July 31, 2019
12:00-1:00pm (PT), 11:00am-12:00pm (AKT)

Presenter: Sara Glick, PhD

Cost: Free ([registration required](#))

Technology: This webinar will use the [Zoom](#) platform. Instructions on how to connect will be provided by email when you register.

About the presenter

Sara Glick, PhD is a Research Assistant Professor in the UW School of Medicine, Department of Allergy and Infectious Diseases and an epidemiologist in the HIV/STD Program at Public Health – Seattle & King County, where she is the site principal investigator of the Seattle area National HIV Behavioral Surveillance system and also oversees monitoring and evaluation activities for the program's syringe services program. Dr. Glick's research largely focuses on the health consequences of injection drug use and identifying appropriate harm reduction strategies.
