

Healing Two Generations: Research and Clinical Perspectives on Providing Comprehensive Care for Pregnant and Parenting Women with Opioid Use Disorder

April 18, 2019 | 10:00am (PDT), 1:00pm (EDT)

About the webinar

This webinar, sponsored by the Northwest ATTC and the Western States Node of the NIDA CTN, will summarize what makes women's treatment for substance use disorder unique from men's treatment and highlight key issues when providing treatment to women who have opioid use and other substance use disorders. The research that supports the latest clinical care guidelines for women with opioid use disorders, including pregnant women and those with infants, will be summarized including issues of pain management, breastfeeding and neonatal abstinence syndrome/neonatal opioid withdrawal. Finally, clinical tips for providing trauma-informed care to the dyad will be presented.

1.5 CEU (NAADAC) available.

When: Thursday, April 18, 2019 | 10:00-11:30am (PDT),
1:00-2:30pm (EDT)

Presenters: Hendree Jones, PhD and Carl Seashore, MD

Cost: Free ([registration required](#))

Technology: This webinar will use the [Zoom](#) platform. Instructions on how to connect will be provided by email when you register.

About the presenters

Hendree Jones, PhD is Executive Director at UNC Horizons and Professor at the Department of Obstetrics and Gynecology, UNC Chapel Hill. She is an internationally recognized expert in the development and examination of both behavioral and pharmacologic treatments for pregnant women and their children in risky life situations. Dr. Jones has written over 195 peer-reviewed publications and also authored two books, one on treating patients for substance use disorders and the other on comprehensive care for women who are pregnant and have substance use disorders. Dr. Jones leads or is involved in projects focused on improving the lives of children, women, and families in numerous countries around the world.

Carl Seashore, MD is a Professor of Pediatrics in the Division of General Pediatrics and Adolescent Medicine and is soon to be the pediatrician in residence at UNC Horizons. He is a general academic pediatrician with interest in quality improvement, newborn care, ambulatory pediatrics, and informatics. He was previously Service Line Leader for Newborn Care and is currently Director of Informatics for Children's Services and a Lead Informatics Physician for UNC Healthcare. Dr. Seashore has worked extensively with the Perinatal Quality Collaborative of North Carolina (PQCN) on projects relating to newborn care delivery across the state, helping lead several initiatives including those aimed at improving care for babies with neonatal abstinence syndrome and risk for sepsis.
