

Biennial

MARIJUANA RESEARCH REPORT

2017-2019

University of Washington Alcohol & Drug Abuse Institute

The Alcohol & Drug Abuse Institute (ADAI), a multidisciplinary research center at the University of Washington's Health Sciences Administration, has been the recipient of the **Washington State Dedicated Marijuana Fund for research at the University of Washington** since July 2015.

This report presents the activities and products developed by ADAI with support from the Dedicated Marijuana Fund during the 2017-2019 Biennium.

IN THIS REPORT

Page 2 | **Message from the Director**

Dr. Susan Ferguson summarizes ADAI research and projects supported by the Marijuana Dedicated Fund in 2017-2019, and previews our ongoing work in this important area.

Page 2 | **Research Funding**

ADAI's Marijuana Small Grants Program supported UW departments to conduct studies on the long and short term effect of marijuana use. Intramural projects analyzed marijuana advertising in Washington and state and national data on marijuana use among vulnerable populations.

Page 4 | **Science-Based Education and Dissemination**

Dissemination of research findings involved the ADAI marijuana website, a UW symposium, and the ADAI Clearinghouse. ADAI scientists developed Research Briefs and Factsheets summarizing research findings for the public.

Page 5 | **Collaboration and Outreach**

Collaboration with various state, county and non-government agencies brought education, research and community outreach opportunities.

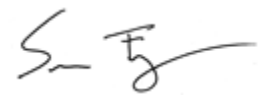

2019 North American Cannabis Summit

MESSAGE FROM THE DIRECTOR

As the new director of the UW Alcohol and Drug Abuse Institute, I'm pleased to present this report on marijuana-related activities over the 2017-2019 biennium. During this period the Institute supported 8 marijuana pilot research projects by scientists throughout the university, bringing the total to 15 small grants funded since 2015, and 5 intramural projects within ADAI. Findings from these grants continue to lead to full projects with outside funding, and numerous publications and presentations. ADAI also conducted scientific literature reviews in order to develop 9 research-based fact sheets and policy briefs that can be found at <https://adai.uw.edu/information/publications-reports> and <http://learnaboutmarijuanawa.org>.

Our scientists and information specialists bring a wealth of expertise to aid policy makers, clinicians, and the public to better understand and respond to the impacts of legal marijuana in Washington. Looking forward, ADAI will continue funding marijuana pilot research projects, with a current RFA soliciting proposals for the 2019-2021 biennium. We're also starting to plan the 4th Symposium on Marijuana Research for Spring 2020, where we will again share UW marijuana research with policy makers, healthcare providers, and the marijuana research community within the UW. I have joined my ADAI colleague Dr. Bia Carlini on the board of the university's Center for Cannabis Research. In all these efforts, ADAI anticipates extending our collaborative work with colleagues across the University community, the state, and beyond.

Susan Ferguson, PhD
Director, Alcohol & Drug Abuse Institute

RESEARCH FUNDING

UW Extramural Research Projects

ADAI issued a Request for Applications for small grants on marijuana research in 3 funding cycles in FY2018–FY2019. The RFA generated applications across multiple disciplines and University of Washington departments. Through peer review, **eight projects** were selected for funding:

ADAI Intramural Research Projects

This low-cost and expedient internal funding mechanism resulted in meaningful small projects that will generate academic publications presenting new data on marijuana advertisement, use among older adults, and an analysis of the Washington State marijuana traceability system. **Five projects** were funded:

Find detailed descriptions and updates:
http://bit.ly/ADAI_Intramural2017-2019

Non-Medical Marijuana Advertisement in Washington State

Beatriz Carlini, PhD, MPH

Project 1: Non-medical marijuana advertisement in WA State: content analysis of two freely distributed magazines.

Publication: Carlini BH, Harwick R & Garrett SB. Anytime is the right time: A content analysis of marijuana ads in freely distributed print media in Washington State, USA. *Substance Use & Misuse* (under review).

Project 2: Marijuana Industry and marketing regulations in WA State: an analysis of WA Liquor and Cannabis Board (LCB) advertisement violations database, 2014-17.

Presentation: Garrett S, Carlini BH & Firth C. Marijuana Advertisement Violations in WA State: 2014-2017 Poster presented at North American Cannabis Summit, January 2019, Los Angeles, CA.

Cannabis Use among Older Adults in the US

Susan Stoner, PhD

Project 3: Analysis of 2016 Behavioral Risk Factor Surveillance System (BRFSS) data examining correlates of marijuana use in the past 30 days among older adults in Washington State and nationally.

Publication: Stoner SA, Carlini BH & Donovan D. Correlates of marijuana use by older adults in the context of legalization. *Cannabis* (2019, under review).

Project 4: Correlates of marijuana use among older adults from the National Survey on Drug Use and Health (NSDUH), 2012-2016.

Presentation: Stoner, S. A. *Cognitive and behavioral risk correlates of marijuana use by older adults*. Poster presented at 2nd Annual Meeting of the Research Society on Marijuana, Fort Collins, CO. Abstract in *Cannabis* 2018; 2(1), 89-90.

Improving Measurement of THC Sales and Consumption

Jason Williams, PhD, Caleb Banta-Green, PhD, MPH

Project 5: Estimating THC from marijuana sales data in King County: An analysis from sales records and suggestions for improvement.

Presentation: Williams J. Alcohol & Drug Abuse Institute: Estimating Cannabinoids Sold from Messy Marijuana Sales Data. Presented at North American Cannabis Summit, January 2019, Los Angeles, CA.

SCIENCE-BASED EDUCATION AND DISSEMINATION

Learn About Marijuana

Science-based information for the public

I-502 directed \$20,000 annually to ADAI for the "creation, maintenance, and dissemination of science-based public education materials," resulting in the website LearnAboutMarijuanaWA.org.

There, ADAI publishes Research Briefs and Factsheets on dozens of marijuana topics; special pages for parents, teens, adult consumers, Spanish-speakers, and people seeking help for problem use.

In the 2017-2019 Biennium, the website received 1,180,459 page views. It is widely viewed as an authoritative source for information about marijuana, with more than 700 organizations in Washington and other states linking to it.

Research Briefs and Fact Sheets

In the 2017-2019 biennium, ADAI Research Scientists developed 13 research summaries and factsheets on topics that are frequently requested by providers, community groups, students, and professionals. These resources are available on the LearnAboutMarijuanaWA.org website and also distributed by the ADAI Clearinghouse at provider conferences and community events across Washington State. These reports were developed with support from the Dedicated Marijuana Fund and Washington State Division of Behavioral Health and Recovery.

The screenshot shows the title page of a report titled "Marijuana Source Assessment Matrix: What Do We Want to Know About Marijuana Access?" by Susan A. Steiner, PhD, Research Consultant. It includes a table of National Studies/Instruments with columns for Study, Year, Population, Mode, Question, Answer Choices, and Notes/Comments. The table lists studies like "Washington Recovery" and "Washington Marijuana" with details on their methodologies and findings.

Social Media

From the Twitter account [@MarijuanaUW](https://twitter.com/MarijuanaUW), ADAI tweets about publications and news about marijuana science to its nearly 650 followers, with a special focus on activities and news in Washington State.

Workforce Training

In the previous biennium ADAI created online trainings about marijuana for medical providers and for the staff of the Washington Recovery Help Line. In 2018, we revised the 5-module training to reach a broader audience of people in the helping professions and the general public. These short, interactive modules answer frequently asked questions on topics related to marijuana.

COLLABORATION AND OUTREACH

3rd Symposium on Marijuana Research in WA State: Partnership with WSU

This UW-WSU event was held in May 2018 on the UW Seattle Campus, with approximately 200 attendees. Its intent was to share with policy makers, legislators, and community partners the research being conducted by the two universities. Washington State Attorney General Bob Ferguson provided the keynote address.

Video of the complete program is available at:
<http://adai.uw.edu/mjsymposium>

UW Center for Cannabis Research

The UW Center for Cannabis Research (CCR) was created in 2017, representing the Schools of Medicine, Social Work, Public Health, Law, the Alcohol and Drug Abuse Institute, and the College of Arts and Sciences, reflecting the strong interest in cannabis research across the university.

ADAI Senior Scientist Bia Carlini has been a member of the CCR Board since its inception; ADAI Director Susan Ferguson joined the CCR Board in July 2019. ADAI helped to plan and support the first CCR research retreat, where cannabis researchers from both UW and WSU, and the private sector met to engage in strategic discussions to identify research priorities. <http://bit.ly/CCRretreat2018>

Outreach to Government and Community Organizations

ADAI staff continue to work with local and national organizations around issues related to marijuana. Examples of this consultation and partnership include:

Collaborations and Consultation with State and County Agencies

Health Care Authority, Washington State Division of Behavioral Health and Recovery (DBHR)
Youth Marijuana Prevention & Education Program, King County
Washington State Liquor and Cannabis Board
Washington State Institute for Public Policy report on I-502

Presentations to Community Organizations

WA Cannabis Summit. "Cannabis Advertising", presented by Beatriz Carlini. Cannabis Alliance. SeaTac, January 2019.
Associates in Behavioral Health. "Marijuana and Anxiety," presented by Susan Stoner. Seattle, WA, April 2019
Olympic Area Agency on Aging. "Older Adults and Marijuana Use," by Susan Stoner to, Shelton, WA, November 2018 and Sequim, WA, May 2018

International Outreach

ADAI hosted meetings with representatives from the New Zealand Drug Foundation and Quebec Public Health discuss and advise about Washington's experience with legalization and marijuana potency.

LOOKING FORWARD

As the recipient of I-502 funds for the 2019-2021 Biennium, ADAI will continue to promote research through the Marijuana Dedicated Funds Small Grants Program and intramural projects, emphasizing collaboration with state and national organizations.

Research dissemination and training will continue and expand through ADAI's [Learn About Marijuana](#) website, the ADAI Clearinghouse, and training events.
